A Cornerstone of Health
Why Now, More Than Ever, You Need a Massage

While you may be tempted to trim your wellness budget when economic times are tough, now more than ever, massage should play a role in reducing stress and strengthening the health of Americans.

When you feel your best, you are more likely to be able to face the challenges difficult times present. With greater health and peace of mind, you can face difficulties with poise, clarity of purpose, and strengthened emotional reserves.

Truly, massage is more than a luxury—it’s a vital part of self-care that has a positive ripple effect on us as we work, play, relax, live life, and care for others. reducing the risk of stress-related illnesses, massage also boosts immunity, helping you fight colds, flu, and other viral infections.

Following is a sampling of a long list of bodywork benefits:
- Ease anxiety.
- Reduce the flow of stress hormones.
- Improve sleep.
- Boost the immune system.
- Build energy levels.
- Reduce fatigue.
- Foster concentration.
- Increase circulation.
- Develop self-esteem.
- Reduce frequency of headaches.
- Release endorphins.

Invest In Yourself, Invest in Those You Love
In economically challenging times, it is vital to invest in preventative health care. The last thing you want is to get sick, have to take time off of work, and pay expensive medical bills. Staying healthy means maintaining your ability to take whatever life has to throw at you. Besides lowering stress levels and, in turn, And if you think about it, massage is an excellent value. The price of massage has remained stable in recent years, as the cost of movies, dining out, and sports events has risen. Which of these has the power to improve your health and your outlook on life?
The positive effects of regular massage can have far-reaching effects in many areas of your life.

At Home
Massage therapy will also help families under stress create healthier households with clear-thinking and more relaxed moms and dads. Children are very sensitive and often pick up on tension in a household; parents who are taking care of themselves are more likely to be better caregivers and provide a sense of security to their kids. This goes for caregivers of aging parents and other family members.

At Work
The health benefits of massage can help forestall illnesses and lost work time, especially when you may be asked to produce more with fewer resources. Decision-making skills will be better and your performance is likely to be improved with a clear focus and more energy.

A hint for the boss: Research shows employees exhibit less stress and improved performance when given twice-weekly, 15-minute massages in the office!

For Health Conditions
Those with already existing health conditions can continue to reap benefits in the following ways. And proactively caring for health through massage may help reduce costly doctor visits and use of prescription and over-the-counter medications.

Research shows:
- Massage can reduce sports-related soreness and improve circulation--good to know when you may be exercising more to reduce stress.
- Deep-tissue massage is effective in treating back pain, arthritis, osteoarthritis and fibromyalgia. Fibromyalgia patients receiving massage also have less pain, depression, anxiety, stiffness, fatigue, and sleep problems.
- Massage reduces symptoms of carpal tunnel syndrome.
- Oncology patients show less pain, fatigue, nausea, anxiety and depression following massage therapy.

- Stroke patients show less anxiety and lower blood pressure with massage therapy.
- Massage therapy is effective in reducing postsurgical pain.
- Alzheimer’s patients exhibit reduced pacing, irritability and restlessness after neck and shoulder massage.
- Labor pain. Massage during labor appears to reduce stress and anxiety, relax muscles and help block pain. Some medical professionals believe massage also reduces tearing, shortens labor, reduces the need for medication and shortens hospital stays.
- Preterm babies receiving massage therapy gain more weight and have shorter hospital stays than infants not receiving massage.
- Massage is beneficial in reducing symptoms associated with arthritis, asthma, high blood pressure, and premenstrual syndrome.

There is now a body of research to support the benefits listed above. But there’s no greater testimonial than the person who is a regular receiver of massage. The first-hand experience of bodywork clients largely echo the same sentiment: bodywork enhances quality of life, and the return on your investment is great.

While bodywork feels like a luxurious mini-vacation, and you should by all means enjoy it, there is an actual physical need for massage. Maintaining a regular massage schedule will help you operate at your peak level--whether it be at work, at home, or at play. Invest in yourself, and book a massage today.
What is Qi?

A fundamental concept of traditional Chinese medicine (TCM) dating back over 3,000 years, qi (pronounced "chee") is the Chinese word for energy, which also carries with it connotations of air, breath, and life force.

In TCM, it is understood that everything from humans and animals to rocks and trees is filled with qi. This energy facilitates function, communication, and connection and is the uniting force of the universe, as well as the animating life force in all objects.

Qi in the Body

Qi flows through the body via 14 meridian channels, which run either up or down throughout the body along specific pathways. These pathways deliver energy to organs, structures, and systems in a constant pattern, and when qi is flowing unimpeded along these meridians, a person is said to be in balance.

Illness, injury, stress, and other trauma can cause blockages along these meridians, thus impairing or stopping the flow of qi and resulting in energy congestion. Several TCM techniques are designed to clear these blockages and restore balance and flow to the body’s energy.

Working with Qi

Along each meridian are points, known as acupoints or pressure points, where these energy blockages are likely to occur. Significant acupoints are also known as trigger points, and these are often starting points for therapists working to clear congested qi.

An important principle of qi is that clearing blockages at certain trigger points will help restore flow and thus impact parts of the body that are connected along the various meridians. For example, this could mean that working on someone’s foot might benefit an internal organ like the liver, or benefit his or her heart. This concept further illustrates that qi in the body is one balanced system in which one imbalance can affect several body parts and even alter emotional states.

High Time for Tea

Discover the Healing Properties of Taking Tea

The health research is enough to make you forego the latte for strong brewed tea instead. Name your color -- black, white, green, even red -- teas are packed with disease-preventing antioxidants (more than some fruits and vegetables) and contain vitamins, minerals, and at least half the caffeine of coffee.

Fortified with free radical-fighting polyphenols, tea drinkers have a reduced risk of many different cancers, in particular stomach, colorectal, and even skin cancer. Tea drinkers also have a lower risk of heart disease, stroke, and high cholesterol. Containing anti-inflammatory and arthritis-preventing properties, tea also helps stimulate the immune system and protect the liver against toxins.

But you have to drink up. Most research points to five or so cups of brewed tea each day to reap the health benefits. Decaf tea loses some but not much of its health punch, due to extra processing.

All traditional tea -- white, green, oolong, and black -- is derived from the leaves of an evergreen tree called the Camellia sinensis, and all contain the health-promoting polyphenols. White tea is made from young tea leaves, dried in the sun without fermentation or processing. Green tea is dried with hot air after picking, so it retains its color but is not fermented. Oolong tea, sometimes referred to as “brown” tea, is fermented but not processed to the point of black tea. Black tea, on the other hand, is fully fermented, which accounts for the color of the leaves and its stronger flavor.

Rooibos, or red tea, is naturally caffeine-free and from the Aspalathus linearis, a shrub that grows only at high altitude near Cape of Good Hope in South Africa.

Herbal teas are made from a variety of plants, roots, bark, seeds, and flowers and are technically herbal infusions rather than tea. Though they don’t contain the same antioxidants and haven’t received the same research-based accolades as traditional tea, the herbs in these infusions have certain healing properties that have been used for centuries to treat many common health issues.
Those who bring sunshine into the lives of others, cannot keep it from themselves.
